

NEW CHANGES TO HANDICAP SYSTEM

The new changes to the handicap system is up and running. A few members have experienced some difficulty with the app on their mobile devices, we kindly request that if you do experience any problems with the new app, to please update your app or reinstall the app. Please remember your personal log-in details and if you do not remember your log-in details or password, please get in touch with Handicaps Network Africa as the Club do not have access to your personal log-in details. Here is a small reminder of the changes that came into effect on 1 October 2019:

1. AVERAGE OF THE BEST 8 OF THE LAST 20 SCORE DIFFERENTIALS

Your Handicap Index calculation will be based on the average of your best 8 Score Differentials from your last 20 scores, with no further adjustment. All Handicap Indexes were recalculated on 30 September 2019. The impact will be different for each golfer, so your Handicap Index might now be slightly higher or lower than your current Handicap Index, due to the combination of the average of the best 8 of the last 20 scores and the dropping of the 0.96 multiplier.

2. MAXIMUM SCORE ALLOWED ON A HOLE CHANGES TO NET DOUBLE BOGEY

When entering your score for Handicap purposes, the maximum score allowed, and what you have to record for a hole where you 'ring out', is a Net Double Bogey (Net Two Over Par or Zero Stableford Points – as shown in the table below).

Course Handicap Strokes on a Hole	Maximum Score on a Hole
-1	1 over par
0	2 over par
1	3 over par
2	4 over par
3	5 over par

3. 9-HOLE COURSE HANDICAP

When playing nine holes you must use your 9-hole Course Handicap based on the nine holes you elect to play. This 9-hole Course Handicap can be looked up on a chart at the club or on the HNA App.

4. 9-HOLE SCORES AND INCOMPLETE ROUNDS

If you have played between 9 holes and 13 holes, you must enter a 9-hole score. If you have played 14 holes or more, you must enter your Adjusted Gross Score for the holes played and add par plus any Handicap Strokes you are entitled to for the remaining unplayed holes, based on your Course Handicap. Enter this Adjusted Gross Score as an 18-hole score. The 9-hole calculation will automatically be completed by the system by taking your Gross Score for the 9 holes you played, adding par for the second nine, plus your handicap strokes for these 9 holes, plus 1 additional stroke. This Gross Score will then be used to calculate a differential in the same way as an 18-hole score.

5. HOLES NOT COMPLETED – MOST LIKELY SCORE

Where possible, players should always putt out and complete the hole. If, however, you do not finish a hole and you are on the green and within 1.5 metres of the hole, record 1 extra shot. If you are between 1.5 metres and 20 metres from the hole, record 2 or 3 strokes, depending on the difficulty of the green and the player's ability. If you are more than 20 metres, then add 3 or 4 strokes, depending on the difficulty of the green and player's ability.

6. 24 HOURS TO ENTER A SCORE BEFORE RECEIVING A PENALTY

The time frame for entering a score before incurring a penalty has been reduced from 72 hours to 24 hours. Failure to enter a score within 24 hours (from 23h00 on the day of the round) will result in a penalty and the late score entered will be adjusted to the lowest differential in the player's last 20.

7. GOLFERS ARE REQUIRED TO ENSURE A ROUND IS REGISTERED / OPENED BEFORE PLAYING AND BEFORE ENTERING A SCORE

Golfers need to ensure a round is opened / registered on the system before they play. The clubs are encouraged to open all rounds (including those for affiliated visitors) on the club systems or terminals. If, however, the club does not open the round prior to play, the golfer must open a round on his/her HNA phone app or on the Handicap Terminal before play. (This option is available on the App and Terminal). A score may not be entered without opening a round. Any score entered for which the round was opened only after completion of the round will be flagged in the system for possible investigation by your Club Handicap Committee. All valid rounds (see section 5.6 of the GolfRSA Rules for invalid rounds), played with a marker and under the Rules of Golf, must be entered on the system. This now includes all Match Play scores.

8. THE EXCEPTIONAL SCORE WILL BE CHANGED TO

If a player's score differential is 7 to 9.9 shots below their Handicap Index, their Handicap Index will be reduced by 1 shot. If a player's score differential is 10 or more shots below their Handicap Index, their Handicap Index will be reduced by 2 shots.

9. THE MAXIMUM HANDICAP INDEX WILL CHANGE TO 54 FOR MEN AND WOMEN

WORLD HANDICAP SYSTEM FINAL CHANGES

The final changes to be made with the adoption of the World Handicap System on 1 January 2020 will be communicated to golfers in detail in the next few months. Importantly, these final changes are all system related, so they will be applied by the HNA system after the golfer has entered his/her score. They include a Playing Conditions Calculation that adjusts the Course Rating when adverse weather or course setup conditions affected the day's scores, as well as a cap on the amount a handicap can increase in a rolling 12-month period.

FINAL NOTE

Thank you for the positive way you have accepted and adopted the recent changes. With these latest changes and the adoption of The World Handicap System by South Africa and the majority of the countries in the world, your Handicap Index will be recognised and accepted worldwide on 1st January 2020.
